

RUBINETA

RUBINETA is a European developer and manufacturer of faucets, shower systems, bathtubs, shower enclosures, bathroom accessories, connection hoses and spare parts, which always focuses on impeccable products' quality, modern design and technological innovations.

Continuing the tradition of successful cooperation with existing partners, RUBINETA strengthens its position in the markets it already works, continuously improves customer service and creates prospects for stable mutual growth.

WHY IS IT BENEFICIAL TO WORK WITH RUBINETA?

TRIPLE CHECK

ASSORTMENT

More than 20 years of experience in the development and production of faucets, as well as the use of the latest technological solutions allow RUBINETA specialists to create a marketable assortment and to successfully adapt it to the changing behaviour of customers. The long-term result we are proud of – continuous supply of products to more than 30 countries and successful sales growth in them.

RESPONSIBILITY AND QUALITY ASSURANCE

The main goal of RUBINETA is the assurance of the impeccable quality of our products to trade partners and end buyers, as well as the high level of production process standards.

The unique quality control system TRIPLE CHECK for faucets includes control of the chemical composition of the raw materials and its physical parameters; regular laboratory inspection of products, carrying out the control to ensure the established technical requirements, and 100% control of the production before sending it to the customers.

Certification of products and its manufacturing processes is a confirmation of the manufacturer's reliability. The quality of RUBINETA brand products is confirmed by the required hygiene certificates, as well as certificates proving its quality compliance with the highest international production standards.

INTERNATIONAL SALES EXPERIENCE

The RUBINETA brand is registered in as many as 170 countries around the world. Trademark rights guaranteeing the protection of intellectual property are crucial for the development of products' export. This gives us the opportunity to control the use of the brand and tailored innovative production solutions, thus strengthening our competitive position in foreign markets.

EFFECTIVE COMMUNICATION

Representatives in all markets guarantee prompt response and solutions for any issues arising for business partners. Smooth cooperation helps to develop mutually successful sales.

STRATEGIC PLANNING

In order to maximize mutual commercial benefits through the development of cooperation, together with trading partners, we prepare and implement sales development planning focused on the needs of each specific market and consumers.

EFFECTIVE MARKETING STRATEGY

We are constantly looking for effective marketing tools to differentiate RUBINETA™ products from the competitors.

RUBINETA's main goal is to develop products which meet different needs of our customers. People are looking for innovative, fashionable, functional high standard products. Our team of professionals constantly follow consumer needs and new technology solutions, therefore our goal is not only to meet, but also to exceed the expectations of our customers.

Kitchen faucets with custom design and functionality are becoming increasingly popular. That's why we have developed new Ultima-50 models in all-black and a combination of black and rose gold elements. We have also expanded the Swan series with its distinctive design and original controls. These push-button activated sink faucets are now available in 3 colours: classic chrome, matt black and stainless steel. For those looking for a versatile solution, kitchen faucet with retractable spout is the perfect choice. The pull-out spout is very easy to use, fun to hold, easy and simple to wash dishes, rinse the sink and fill larger dish that don't fit in the sink.

*"For more than 20 years, we have been following the ever-changing trends in faucets and shower products. The main task of the purchasing department is to incorporate the latest tendencies into our products in a way that is most beneficial to the consumer", – says head of the purchase department **Laima Kundrotienė***

*"We pay special attention to kitchen space, so we are expanding our range with kitchen faucets with a pull-out spout. We are looking for the best solutions for the bathroom to ensure maximum ease of use and to widen creative freedom: we are expanding the range of shower systems, starting with push-button handshowers, a range of colours for bidet faucets, and introducing new click-clack waste models that work well with washbasin faucets", – **Rūta Babič**, head of Product department*

*"We are continuously developing technological solutions that ensure the product's long-lasting, flawless use. Unique, extremely strong and durable new polymer coating with a 5-year warranty RubiCoat-E will dispel consumer doubts about the durability and maintenance of a coloured faucet. The PVD coating used on stainless steel and rose gold ensures maximum wear resistance, low coefficient of friction, high corrosion resistance and long service life", – head of Quality control department **Lorentas Bogušis***

*"Carefully designed and manufactured components and parts are an invisible but equally important part of the quality. Faucets are manufactured in accordance with EN 817 standard. The push-button operated faucets and handshowers, concealed, water-saving aerators and aerators with adjustable flow rate are the result of our approach to offer a variety of user and environment friendly solutions. All of us in the RUBINETA team closely follow consumer needs and the global trends that require sustainable use of resources, so we design with your needs in mind", – engineer **Justinas Kuncė***

BLACK ACCENTS IN BATHROOMS INTERIOR DESIGN

There is a growing popularity of various black faucets and other bathroom accessories every year. Black bathroom products are becoming as popular as "classic" chrome or stainless-steel products. Often black matte colour is combined with chrome or gold elements. Black products go well with natural finishing materials, such as wood, marble or other stones, and therefore they are increasingly chosen as accents for various interior styles.

In the process of black faucet production, RUBINETA uses technology of colour coating by electrolysis. This technology provides an extremely strong and long-lasting coating that gives a product tasteful and luxurious look. Therefore, black RUBINETA faucets not only attract the attention of interior designers, but at the same time is a great, practical and long-lasting solution for everyday use.

RUBINETA uses the latest technological solutions on the market and strives to keep up with fashion trends, moreover RUBINETA pays great attention to offering user-friendly complex solutions.

How to clean matt coloured surface ..	189

We spend a lot of time in the kitchen, not only cooking, but sharing precious moments with our family and friends, especially now, when most kitchens are in one common space with the living room. Therefore, kitchen faucets become one of the interior accents. In RUBINETA we aim to create the best solutions in both functionality and design.

KITCHEN FAUCETS

Our wide range of kitchen faucets offers variety of technical solutions and styles: pull-out spouts, push-button operated faucets, separate input for filtered water, broad colour palette and diverse designs – from timeless classics to bold and modern solutions.

PULL OUT SPOUT NEW KITCHEN FAUCETS

Pull out spout offers you a high level of flexibility when cleaning pans, pots and every corner of the sink. Due to the large range of movement, you can fill containers of any type and size without restriction.

Handle – facilitates even temperature and water flow regulation. Adjustment angle 110°. Chromed metal.

Ceramic cartridge regulates water flow and temperature. Warranty for 150,000 switching cycles!

Faucet's body is made of high quality brass.

Faucet base is a decorative metal component for covering the faucet mounting hole in the washbasin / table top.

High quality, durable and glossy **chrome plating**.

Aerator is a water-saving component made of specially designed ecological ABS plastic for efficient water with air mixing.

Flexible faucet connection hoses 60 cm FLIESSER connection hoses made of PEX type pipe, braided with polyester, which is covered by a warranty of up to 10 years!

* Faucet ELMA-18

Eccentric plates are a decorative details made of chromed metal.

Faucet's body is made of high quality brass.

High quality, durable and glossy **chrome plating**.

Back nut is designed to protect the water supply system from contamination with dirty water.

Ceramic valve regulates water flow and temperature. Warranty for 150,000 cycles!

VERNET thermo valve for automatic water temperature regulation. Warranty for 100,000 switching cycles!

Semi-automatic diverter for convenient and reliable switching of water flow to the shower head.

Aerator is a water-saving component made of specially designed ecological ABS plastic for efficient water with air mixing.

* Faucet Thermo-10

Specially designed 2-channel aerator:

1. For supplying water flow from the water pipe
 2. For the supply of filtered drinking water.
- Made of ecological ABS plastic.

High quality, durable and glossy **chrome plating**.

Faucet's body and spout are made of only high quality brass. The inner tube of the spout used in faucets for filtered water is made of copper. Warranty for 80,000 cycles.

Ceramic 90° faucet valve ensures convenient and high-quality water flow control. Warranty for 150,000 switching cycles!

Handle – facilitates even temperature and water flow regulation. Adjustment angle 110°. Chromed metal.

Separate connection for filtered water.

Ceramic cartridge regulates water flow and temperature. Warranty for 150,000 switching cycles!

Faucet base is a decorative metal component for covering the faucet mounting hole in the washbasin / table top.

Flexible faucet connection hoses 60 cm FLIESSER connection hoses made of PEX type pipe, braided with polyester, which is covered by a warranty of up to 10 years!

Mounting kit – a convenient and reliable mounting solution, perfect for even thin-walled sinks.

* Faucet Ultra-32

STANDS

Branded stands with standard dimensions:

- GLOSSY type stands for faucets display

- ECO TWIN stands for shower products and spare parts

Individual non-standard product display solutions are possible.

- Various stand solutions for concealed faucets

- Boards for shower systems

Branded cardboard boxes for:

- faucets
- faucet sets
- shower products
- some spare parts for faucets

Small bag with cardboard hook for:

- some spare parts for faucets
- faucet accessories

FAUCET MAINTENANCE RECOMMENDATIONS

Dear TMRUBINETA clients! Please note that proper maintenance and adherence to the operating rules will prolong the life of the product you have purchased.

Continuous maintenance of the faucet's surface and all its components will help to ensure its impeccable appearance throughout its service life. To do this, simply wipe the surface with a soft cloth or microfiber cloth. Stains left on the chrome-plated and/or painted surface of faucets by water-containing minerals can be easily removed with soap or a mild dishwashing detergent. After that, wash the surface with clean water and wipe with a soft cloth.

To protect the internal components of the faucet and ensure the longevity of it, we recommend installing a water filter before installing the faucet.

Timely cleaning the faucet and all its parts is a guarantee of reliable operation of the faucet. Periodically (every month) clean the dirt and limescale that has accumulated in the aerator. After unscrewing and removing the aerator, rinse the inner sieve of the aerator under a strong stream of water; immerse the sieve in the vinegar solution for two hours when hardened deposits are found. In the same way, clean the mineral deposits that have accumulated on the shower heads and the nozzles of the ceiling shower head.

Don't forget to periodically replace some naturally worn spare parts with new ones, which durability directly depends on the composition and quality of your water: gaskets, aerators, ceramic cartridges, faucet valves. You will find all the spare parts you may need for the faucet you have purchased during its operation in this catalogue, and you will be able to buy it at points of sale.

You will find all the manufacturer's recommendations in the warranty card included with the purchased product.

HOW TO CLEAN MATT COLOURED SURFACES

- For frequent cleaning we recommend using a mild detergent. For example, vegetable oil-based soap.
- Use light and gentle cleaning forward motions from top to bottom. Please use minimum scrubbing. After cleaning, rinse the surface to remove traces of detergent.
- After use, dry the faucet, shower column or shower head with a soft microfiber cloth. It will help to keep a matt black surface free from limescale for a longer time.
- If there's still limescale on your faucet, just try to use a mild homemade detergent. For example: 9% strength vinegar diluted in equal parts with water or one teaspoon of citric acid dissolved in a glass of water.

DO NOT USE

- Don't use scourers with abrasive particles;
- Don't use any chemicals not suitable for cleaning polymer coating;
- Don't use any cleaners with unknown chemical composition;
- Don't use solvents or aggressive agents;
- Don't polish or wax;
- Don't use bleach;
- Don't use detergents that contain hydrochloric acid, acetic acid, chlorine, phosphoric acid or any other harmful, aggressive acids.

Did you know that fresh water makes up only 3% of the world's water resources, and only 1% of water is suitable for drinking? Extreme climate changes are having a negative impact on our planet. The effects include: melting glaciers, rising sea levels, more frequent floods and droughts in individual regions of the planet, ecosystem degradation, biodiversity loss and declining soil fertility and the negative effects of increased pollution.

Saving natural resources and water is a particularly important goal. Therefore, we must all make a significant contribution to saving that 1% of drinking water supply.

RUBINETA PROTECTS NATURAL RESOURCES

Often a person unknowingly consumes more water than he or she actually needs. RUBINETA products are designed with the idea that each product will function in a way that saves one of the most important natural resources – drinking water. Contactless faucets, water-saving aerators and faucet accessories that are optimally selected for assessing water consumption make a significant contribution to water savings. All this contributes to the rational use of our planet's drinking water resources.

RUBINETA is happy to see like-minded people among its trade partners and end users. THANK YOU to everyone who contributes to the important goal of water saving and chooses the products offered by our company!
