

RUBINETA

— since 1999 —

CATALOGUE

RUBINETA is the European brand of certified sanitary faucets and sanitary accessories best noted for their faultless quality, modern design, innovative technologies and the first-class service. The RUBINETA trademark is known both in Lithuania and many countries of Europe and in the CIS since 1999, and has proven itself in the market as a reliable partner ensuring successful cooperation.

RUBINETA is a professional team of designers, engineers, marketing and sales specialists who made the trademark the largest in the market of the Baltic States. Product range of the company includes a wide selection of sanitary faucets as well as

WE

the accompanying sanitary equipment, the production process of which pays maximum attention to quality and continuous improvement of the output.

RUBINETA is a strict selection of materials and components from the best global manufacturers, control of their chemical composition, physical parameters and production technologies in order to fully comply with the quality standards. It also includes a 100% verification of manufactured products before they reach the hands of the buyer.

Why RUBINETA?

With every Partner we are striving to establish a long-term, close and mutually beneficial cooperation, which includes a wide range of advantages.

Demand for any product and its successful realization always depends on satisfaction of requirements and expectations of the end user for whom the company has been improving throughout its history, and today is distinguished thanks to high competences and business experience.

- **More than 18-year history of experience** in production of a wide range of sanitary faucets and complement products.
- **«Triple Check» quality control system** at the stages of design, manufacturing and assembly with **100% testing**.
- Guarantee of the best quality product in the **shortest delivery time**.
- **Active control of compliance with the trade and pricing policy**, oriented to avoidance of internal competition, and flexible pricing in every market, which ensures optimal balance of design, quality and price and creates the most favourable commercial interest for all Partners.

- Long-term experience of direct deliveries to DIY networks in different countries and related to it experience of application of effective sales increase and product promotion methods.
- **5-year warranty** and post-warranty service. Active civil liability insurance.
- **Hasle free marketing support, including:** distinguishing products in the large competitive environment and encouraging demand of the buyers, as well as advertising and information support.

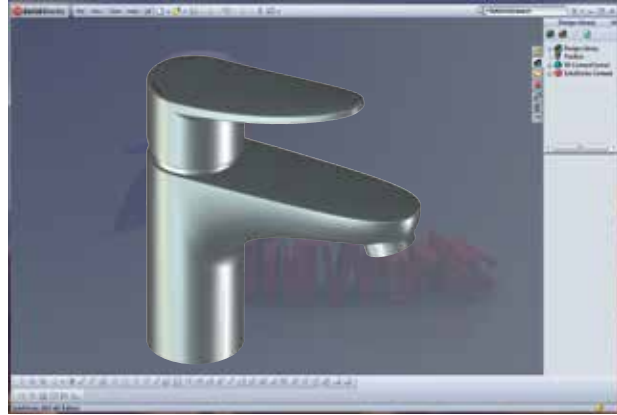

- Introduced effective certified quality control system of manufacturing and company process management **ISO 9001:2008**. Presence of hygienic certificates and product conformity certificates in compliance with the standards of Russia, Republic of Belarus, Ukraine, Republic of Lithuania, Poland, Czech Republic and etc.
- **Quick response** and fast solution of any emerging issues, including qualified consultations for Partners concerning product range and sales increase methods.

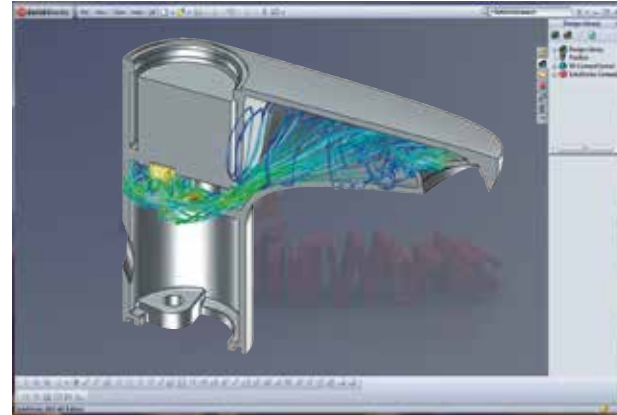

RUBINETA

It all starts with an idea. Taking into account new trends of industrial design and technologies, designers of RUBINETA create concept sketches.

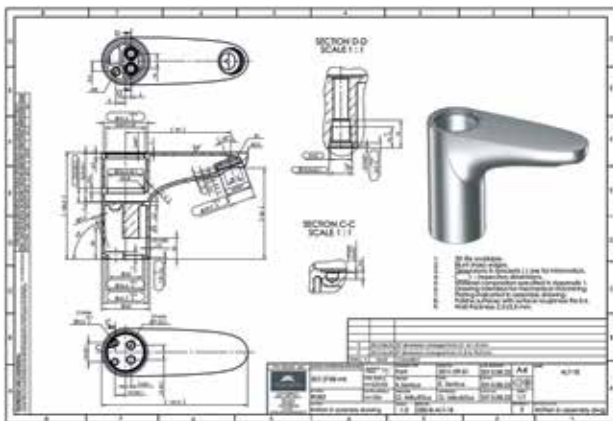

The following stage is a 3D model, which allows to estimate such parameters as ergonomics, usability, design and functionality.

RUBINETA uses the latest technologies for its faucet design. At the development stage, with the help of the „SOLIDWORKS“ program, the processes, which are taking place inside faucets under different conditions, are being simulated. It gives an opportunity to estimate quality of the faucet long before the manufacturing begins. With the help of water flow simulation it is possible to avoid emerging of resistance zones (which are known as the source of noise) and to provide uniform flow in every point of the faucet.

At the following stage the model of the faucet is produced with the help of 3D printer. In this way we can test line of the design and check for design errors.

Then engineers start making the drawings. Casting molds for parts are produced in accordance with 3D model, their mechanical processing – according to the drawings.

We use only the best quality brass alloy with the high content of copper. The reliable system of gravitational molding of bodies ensures the highest quality of molding, absence of micropores and stress in the metal.

Program able machines provide high precision of mechanical processing.

Assembly. Some elements (cartridges, valves) require the verified and correct assembly with a certain force of a clip. For a guarantee of firm assembly without damage of the parts, we use dynamometric wrenches. Such attention to the process ensures durability of all components of the faucet.

For 15 years we have been developing and improving a 3-level quality control system. Control already starts at a design stage and lasts until the moment, when the product reaches the hands of the buyer.

1. Before manufacturing:

- Computer simulation of water flow processes inside the faucet.
- Definition of a chemical composition of the metals by a spectrometer, based on the optical emission method.

2. During the process of manufacturing:

- Quality check of molding under pressure of 25 atmospheres.
- Visual and instrumental quality check of mechanical processing and compliance to the drawings.
- Quality check of electroplated surfaces in the salty environment.
- Input control of the components (cartridges, aerators, etc.).

3. After production:

- Wear resistance testing in accordance with the ISO 2859 standard (every consignment is being tested).
- 100% visual and functional control.

The range of faucets and shower products of RUBINETA will allow to choose design and functionality according to a wide range of consumer demands. Our production will harmoniously fit in any interior and will serve to comfort for many years.

Ergonomic handle allows smooth adjustment of temperature and water pressure.

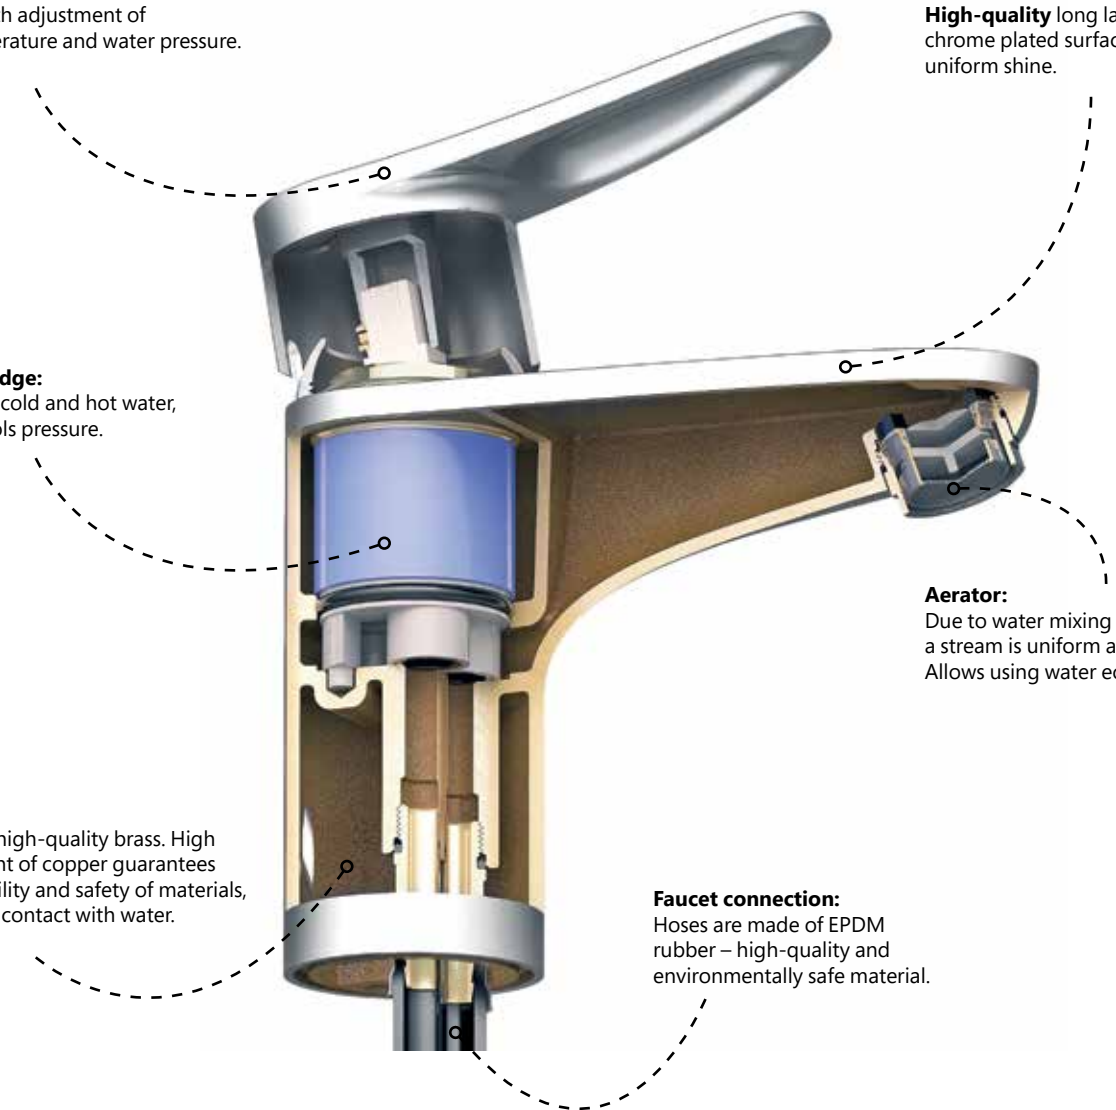

High-quality long lasting chrome plated surface with uniform shine.

Cartridge: Mixes cold and hot water, controls pressure.

Aerator: Due to water mixing with air, a stream is uniform and soft. Allows using water economically.

Body: From high-quality brass. High content of copper guarantees durability and safety of materials, which contact with water.

Faucet connection: Hoses are made of EPDM rubber – high-quality and environmentally safe material.

Valves

F l ü h s
D r e h t e c h n i k

High-quality brass.
Long life of valves due to high quality German ceramics.
Silencers.
Water saving function.
Gaskets of vulcanized rubber, which can contact with drinking water.

Thermostat

Automatically mixes and maintains the set temperature of the water at the outlet.

Prevents burns from hot water in case of cold water pressure drop in the system.

Why RUBINETA uses VERNET thermostatic elements?

- World leader in thermo element production;
- Innovative production and quality control processes.

French company VERNET, which is a part of the American group MAGNUM Corporation, manufactures thermostats since 1927.

Today VERNET is the world leader, which holds key position in the market.

Saving cartridges RubiSave are distinguished by step-by-step system of water flow regulation, which ensures water saving for the entire life of the faucet.

- Minimum noise level
- Ceramic discs are manufactured with high precision

Cartridges

sedal

Spanish company Sedal is a guarantee of unconditional production quality and it's constant improvement.

Aerators

Neoperl® company is the world leader in the production of aerators, and there experience allows to offer the best solutions.

NEOPERL®
Perlator
Honeycomb

Improved lime protection: integrated HONEYCOMB structure replaces traditional wire-mesh filters, which are prone to build-up of limescale.

- extended life
- perfect stream quality even under low water pressure conditions
- very low noise level
- integrated anti-clogging dome screen/filter, which filters sediments and particles

NEOPERL®
Cascade
SLC

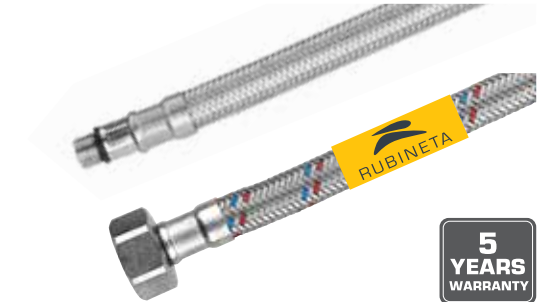

Smart Lime Cleaning (SLC) for a maximum lifespan of aerator of your faucet:

- maximum limescale resistance
- no need to disassemble the aerator for cleaning
- perfect stream quality even when there is low water pressure
- very low noise level
- integrated anti-clogging dome screen / filter, which filters sediments and particles

Just erase limescale with your finger and water spray will become direct and soft again.

Hoses

Faucets can be delivered with two types of connection hoses:

- **BRAIDING:** reinforced, high density braiding weave, from high quality AISI 304 stainless steel. Excellent resistance to water hammers, corrosion and mechanical stress.
- **INNER HOSE:** hose made of nontoxic rubber EPDM. Resistance to high temperature impact.
- **FERRULES:** made of high quality AISI 304 stainless steel. Strength and durability. Method of production – stamping, ensuring a long service life.
- **NUT, FITTINGS and SLEEVE:** High quality CW617N brass. Resistance to mechanical impact and corrosion, excellent connection reliability.
- **LENGTH:** a wide range of hoses of different lengths (from 20 cm to 500 cm).

Segmentation

RUBINETA *Premium*

Faucets of the PREMIUM segment are of exclusive design. Faucets are completed only with the last generation cartridges / valves and aerators made by the leading worldwide manufacturers, guaranteeing application of the globally recognized advanced technologies as well as the most comfortable faultless service of the faucet.

Having carefully estimated needs and financial capabilities of the buyers, RUBINETA marketers have developed a certain segmentation of the faucet line, which distinguishes our products even in a fully saturated competitive environment and provides an accurate positioning in the market.

This segmentation gives a clear and precise definition of individual series, facilitates orientation of the buyer within the range and helps them to make the right choice.

RUBINETA **Extra**

Faucets of the EXTRA segment are known for their modern design and efficiency.

Faucets are completed with reliable saving cartridges, valves of the RubiSave™ line and with aerators made by the leading global manufacturers, guaranteeing water saving throughout the period of faucet operation.

RUBINETA **Standard**

These faucets stand for stability and reliability. All faucets of the STANDARD segment are of a classic design. Every faucet is completed with wearproof cartridges / valves and RubStandard™ line aerators that guarantee time-proof faultless functioning of the faucet.

ADVANTAGES OF THE SEGMENT

- High quality materials
- Ergonomic, convenient and modern design
- All components comply with European standards
- Long life of ceramic cartridges
- Components from leading manufacturers: SEDAL (Spain), FLÜHS (Germany), VERNET (France). Anti-limestone CASCADE® SLC aerator by NEOPERL®, (Germany)
- 5-year warranty

NEW

Concealed faucet

The construction of concealed faucets is installed into the wall. That is why such faucet does not require much space in your bathroom. The minimum number of external parts do not bind and provide flexibility to the process of bathroom interior arrangement. Delicate, comfortable, reliable.

AERO

Series Aero is a compound of exceptional style and functionality. These faucets exemplify contemporary and ergonomic design, as well as correspond to world's trends in the sphere of cautious use of natural resources and care of ecology.

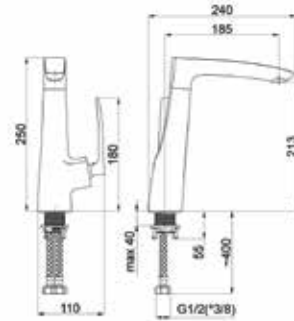

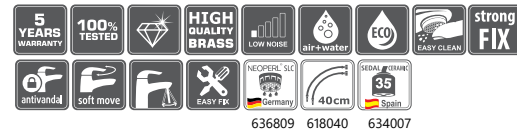

Aero - 18 won the worlds most coveted design prize GOOD DESIGN 2014 from the Chicago Athenaeum Museum of Architecture and Design. This award is a world recognized quality for outstanding product design.

Shower products

SEGMENTATION

RUBINETA *Premium*

PREMIUM is for those who appreciate the latest technologies and the recent trends of design, as well as an unconditional quality and the maximum comfort.

RUBINETA **Extra**

EXTRA is an improved functionality and an up-to-date design (fixing of handshowers with an adjustable gripping angle, heads of a bigger diameter, 360 degree rotation of a hose). It will satisfy any buyer's demands for quality and appearance.

RUBINETA **Standard**

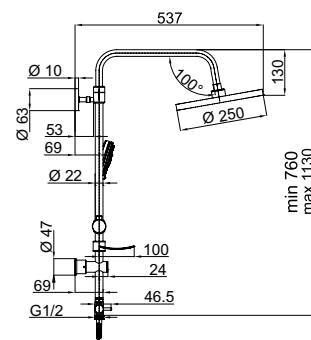

STANDARD – products intended for the buyer who is looking for the best combination of functionality and availability. Reliable, time proven and most popular models.

Shower column

■ River + Thermo-15

625006 | 625013 (Lux)*

River shower column set with a Thermo faucet – a solution for your comfort. The stationary upper shower head will be appreciated by those who enjoy taking a shower under a “rain-effect” stream. Whereas the water-saving handheld shower head – Airforce with three different settings - will satisfy the expectations of those who are more fond of traditional shower heads. The main accent of this set is the thermostatic faucet Thermo. The faucet supplies water at a pre-set temperature which does not change and is not affected by water with inconsistent temperature supplied from the boilers. Thermo ensures the safety of your little family members – it prevents burns and helps avoid unpleasant and stressful fluctuations in water temperature.

CONVENTIONS

100% TESTED – after assembly all our faucets are being 100% tested.

5-YEAR WARRANTY

2-YEAR WARRANTY

HQ BRASS – high-quality brass with lowered content of harmful impurities is one of the most important component materials.

ANTI-NOISE – faucets with the ANTI-NOISE system work silently and do not cause discomfort.

BRILLIANT SHINE – durable and glossy surface on all our faucets. We use more durable coating for shine and long-term use of faucets, which is more resistant to scratches, dents, limescale, rust.

AERATOR NEOPERL® Honeycomb – ensures long-lasting, quiet and flawless performance of the faucet.

NO TOOLS - easy to assemble aerators, no special tools needed.

FLOW-CONTROL - the water stream can be adjusted by moving the aerators plate. The flow angle can be adjusted up to 10 degrees.

CHECK VALVE – mostly used for prevention of impure water backflow to the water supply system.

SYSTEM, WHICH PREVENTS TWISTING OF THE HOSE

VERY RELIABLE FIXING.

AERATOR ANTILIME – we use NEOPERL® Cascade SLC aerators with silicone surface, which prevents the formation of lime scale and provides a steady stream of water over a long period of time. Aerator with ANTILIME function is easy to maintain, you simply swipe your finger over the silicon surface, and remove all the lime scale.

EASY FIX – RUBINETA faucets are installed quickly and easily.

FLOW CONTROL – save water and energy resources with our RubiSave cartridge. Having bought a faucet with RubiSave cartridge, you can not only regulate the water consumption, but also the temperature and so reduce consumption of water up to two times. Applies to all faucets of theEXTRA segment

The smooth work of the faucet is ensured by a pressure valve with a rubber gasket.

Ceramic valve with 180 rotation angle and noise absorber. It ensures long-lasting, silent and smooth functioning.

Ceramic valve FLUSH with flow controller and noise limiter is produced in Germany. Rotation angel - 270°. High quality valve ensures stable, long lasting, silent and reliable functioning.

THERMO – faucet with built-in thermostat. Automatically mixes and maintains the set temperature of the water at the outlet. Prevent burns from hot water in case of cold water pressure drop in the system.

CARTRIDGE 25, 35, 40 mm – faucet is supplied with 25, 35, 40 mm ceramic cartridge, ensuring long-lasting and flawless performance of the faucet.

Hygienic (no contact with the object).

Touchless faucet.

Easier handle movement.

Antivandal proof (Protection Very reliable fixing against theft).

SET – complement: faucet, shower hose, shower holder and handshower. For bath and shower faucets.

DIVERTER with ceramic elements.

DIVERTER with function of automatic switch.

DIVERTER without function of automatic switch.

DIVERTER with function of automatic switch and possibility of state fixation.

AUTOMATIC DIVERTER NEOPERL.

30, 40, 45, 50, 60 CM HOSES – faucet is complemented with 30/40/45/50/60 cm connection hoses.

DOUBLE COUPLING – provides increased strength of shower hose.

Mix air with water.

Saves the water 5l/min.

Saves the water.

PACKING OF SHOWER PRODUCTS

Bright colors of the package set Rubineta's products apart from other manufacturers, and draw attention to high quality product.

The products of PREMIUM segment are packed in high quality cardboard packaging, that protects the product and gives it a proper look.

The products of EXTRA segment are packed in blisters. This ensures visibility of the product and easy transportation.

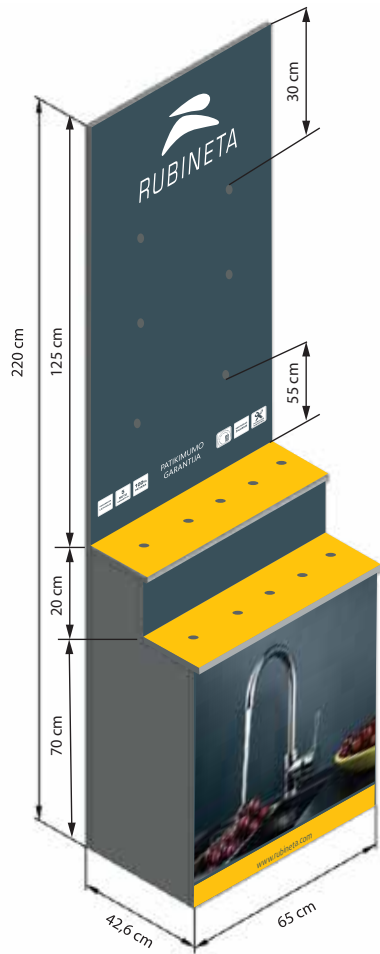

The products of STANDARD segment are packed in polypropylene bag with the pendant. This economical packaging allows to keep the price of the product at the certain level and to cut logistic costs.

STANDS

We propose various solutions for exposition of products. It can be our standard solution, as well as individual in accordance with the needs of Partner.
