

NEW PRODUCTS 2020

RUBINETA is the largest manufacturer of faucets and their accessories in the Baltic States. Started in 1999, RUBINETA is known not only in Lithuania, but also in many countries of Europe and the CIS.

The production range of RUBINETA includes a wide range of faucets, as well as related sanitary equipment. Maximum attention is paid to the quality and continuous improvement of manufactured products. Our products are characterized by impeccable quality, modern design, advanced technology and high level service. RUBINETA is an integrated team of professionals consisting of designers, engineers, marketing and sales specialists, who purposefully move towards a common goal.

Did you know that only 3 % of all water is fresh water and that only 1 % is available for drinking? The extreme effects of climate change will have more negative impact on our planet, like severe floods or prolonged droughts. These events not only can damage water infrastructure, but also affect availability of water. Planet and water saving is extremely important - let's take together important steps to save that 1 % of pure water.

RUBINETA TAKES IMPORTANT ACTIONS TO WATER SUSTAINABILITY

While washing hands, running a bath or using a shower, water often runs longer than it needs to. Yet water is one of the most valuable resources we have. Rubineta's products are designed to function in an environmentally friendly manner for the entire product life cycle. Touchless faucets, water saving aerators in every our faucet and water saving handshowers - these and more our products create a better tomorrow for our Planet's water resources.

The main goal of RUBINETA - to create products that maximally satisfy its costumers and corresponds to all their needs.

An increasing number of consumers is a challenge not only for us. We notice, that people want to find faucets which are innovative, trendy, and more complex in functionality.

Semiprofessional faucets for home kitchens with a longer, flexible spout is on going trend. People are also looking for kitchen faucets with more functions, like drinking water option.

As for bathroom, concealed faucets for showers, baths and washbasins, shower columns and counter top mounted faucets are one of the top choices this year. Touchless faucets also remain popular.

"For 20 years we have been closely watching constantly changing trends in the production of faucets and their accessories. We apply the latest and most useful trends to our products - this is the main task of the Purchase and Product Department," says Laima, the Head of the Department.

Those who have filters for drinking water must have an extra hole in a kitchen sink for a separate drinking water faucet. Let's fix this issue: we offer a two-in-one solution – the Ultra-32 faucet, which has an integrated additional tube for a drinking water. On the left side of the faucet you will find a handle which regulates the function you want from the faucet: drinking water or the usual.

- The faucet body is made of high-quality brass, which is eco-friendly;
- Unique aerator Neoperl with differentiated faucet and drinking water flow;
- In the product package you'll find a tube with a screwed-in plastic quick connector (diameter 6.6 mm) for filtered water;
- Easy to install on any surface.

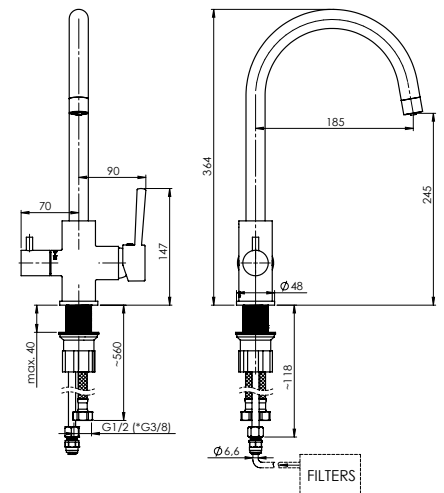

ULTRA

ULTRA-32

Kitchen faucet | 1/2-U32008 | 3/8-U32108

1. Handle with 90 ° ceramic valve CITEC for drinking water;
2. Handle with ceramic cartridge CITEC for mixing hot and cold water.

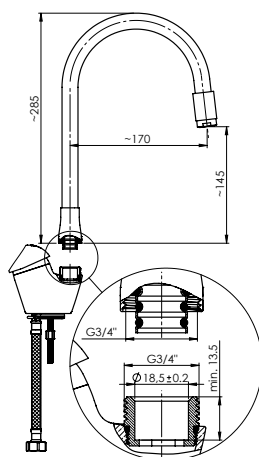

FLEXY UNIVERSAL

From now on you can easily renew your kitchen by just changing the faucet's spout! Our new spouts FLEXY UNIVERSAL are adaptable to basically any sink faucet*. The spout comes with a high quality Neoperl aerator. Universal FLEXY spouts – an economical and quick way to add new colors to your kitchen!

**For faucets with screw-on spouts, the body thread must be $\frac{3}{4}$.*

Benefits:

- Flexible, easy to use;
- Hygienic;
- Durable – withstands 150 000 flexing cycles.

Upscale your bathroom vanity space with concealed faucets TORINO! Sleek, modern, and durable, the TORINO installs on the wall above the countertop to keep a clean and spacious setup. Pick from matte black or classic chrome-plated colours and make your space a stylish one. Faucets are single-handed with a spout which rotates 360° – a truly convenient choice. High quality components and materials ensure longevity of TORINO faucets.

BENEFITS:

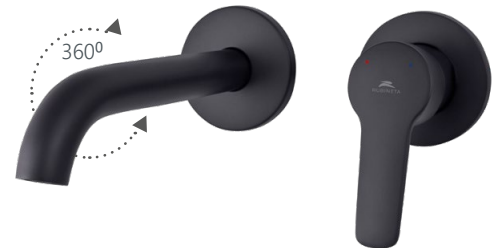

- Easy installation: the mounting plate in the kit, removable spout and handles;
- Maximum usability – 182 mm swivel spout (360°);
- 5-years warranty.

DELI faucets represent timeless design and quality – ideal solution for everyone with a reasonable price point. This series offers a wide choice of faucets – create a solid and sleek style in your home.

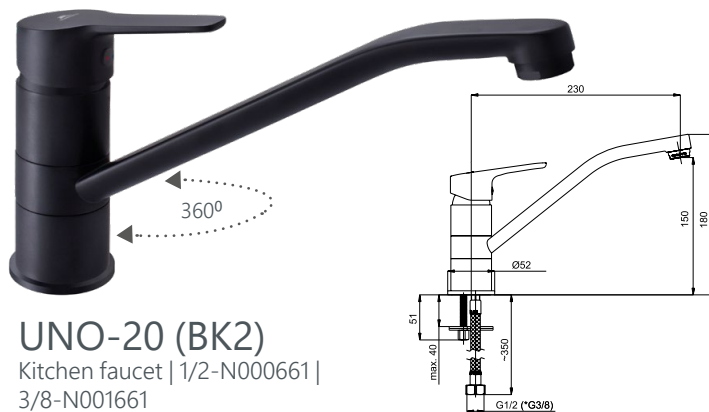

UNO BLACK

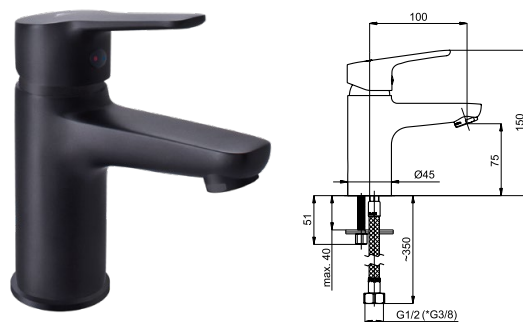

Faucets UNO BLACK (BK2) are plated with a special technology – electroplating. This coating is much more durable coating than painting: it provides greater resistance to corrosion and surface scratches.

Instead of choosing between chrome or brass fixtures, we recommend a bolder option: black. Black can have a huge impact on a space making it feel at once both grounded and modern. Our UNO BLACK (BK2) fully matte black faucets are going toe to toe with black faucets' trend.
