

RUBINETA

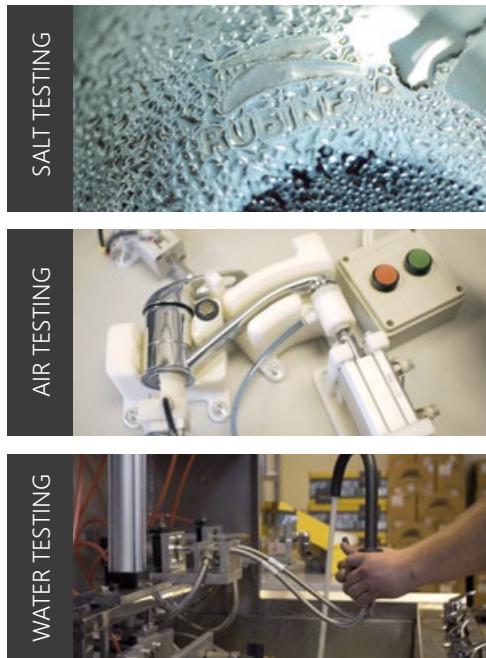

A high-contrast, abstract black and white photograph capturing a dynamic splash of water against a dark, textured background. The water is depicted in bright, white, turbulent patterns that curve and fan out from the bottom left towards the top right. The background is a deep, dark gray or black, providing a stark contrast to the white spray. The overall effect is one of motion, energy, and fluidity.

RUBINETA is a European manufacturer of certified faucets and plumbing accessories, which always focuses on impeccable products' quality, modern design and technological innovations.

Continuing the tradition of successful cooperation with existing partners, RUBINETA strengthens its position in the markets it already works, continuously improves customer service and creates prospects for stable mutual growth.

WHY IS IT BENEFICIAL TO WORK WITH RUBINETA?

TRIPLE CHECK

ASSORTMENT

More than 20 years of experience in the development and production of faucets, as well as the use of the latest technological solutions allow RUBINETA specialists to create a marketable assortment and to successfully adapt it to the changing behaviour of customers. The long-term result we are proud of – continuous supply of products to as many as 32 countries and successful sales growth in them.

RESPONSIBILITY AND QUALITY ASSURANCE

The main goal of RUBINETA is the assurance of the impeccable quality of our products to trade partners and end buyers, as well as the high level of production process standards.

The unique quality control system TRIPLE CHECK for faucets includes control of the chemical composition of the raw materials and its physical parameters; regular laboratory inspection of products, carrying out the control to ensure the established technical requirements, and 100% control of the production before sending it to the customers.

Certification of products and its manufacturing processes is a confirmation of the manufacturer's reliability. The quality of RUBINETA brand products is confirmed by the required hygiene certificates, as well as certificates proving its quality compliance with the highest international production standards.

Products' insurance is a realized mechanism of responsibility for the quality of products. Civil liability insurance protects the interests of consumers: they are offered additional guarantees to receive compensation for damage caused by accidental, as well as hidden defects in the quality of the purchased product.

INTERNATIONAL SALES EXPERIENCE

The RUBINETA brand is registered in as many as 170 countries around the world. Trademark rights guaranteeing the protection of intellectual property are crucial for the development of products' export. This gives us the opportunity to control the use of the brand and tailored innovative production solutions, thus strengthening our competitive position in foreign markets.

EFFECTIVE COMMUNICATION

Representatives in all markets guarantee prompt response and solutions for any issues arising for business partners. Smooth cooperation helps to develop mutually successful sales.

STRATEGIC PLANNING

In order to maximize mutual commercial benefits through the development of cooperation, together with trading partners, we prepare and implement sales development planning focused on the needs of each specific market and consumers.

EFFECTIVE MARKETING STRATEGY

We are constantly looking for effective marketing tools to differentiate RUBINETA™ products from the competitors.

CONCEALED FAUCETS ARE BECOMING ONE OF THE TOP BATHROOM TRENDS

One of the Rubineta's most important tasks is to keep the offered assortment relevant and attractive to the customer. The modern consumer is looking for innovative solutions everywhere, including bathroom and kitchen. Technology makes it possible to create increasingly functional solutions that attract the attention of users no less than the design of faucets.

Observing the changing needs of customers, we can say that concealed faucets are becoming an increasingly common choice. They differ from conventional faucets: the communications are mounted on the wall at the stage of plumbing. The outer part of this type of faucet consists of a metal plate, a handle or buttons, a spout or shower accessories.

Whether the customer is building a new home or renovating an existing one, this innovation is receiving just as much attention as classic faucet models. Concealed faucets not only decorate the modern interior with their minimalist and elegant lines, but are also perfect for small spaces.

We keep pace with trends and offer a variety of faucet solutions. We can distinguish three types of concealed faucets in our assortment:

A stylish novelty – concealed washbasin faucets TORINO-1F.

These faucets are for those who are not only looking for functionality, but pay attention to every detail of the design. We will not be mistaken in saying that faucets of this design are also perfect in the most stylish hotels and apartments. From now on, it can be easily bought by the everyday user. We offer our customers two colour choices – classic chrome and modern matte black. Both colours receive equally successful attention – after all, it all depends on the vision of the client's bathroom interior.

The concealed part of the faucet is a brass body with cold and hot water connection openings and a metal plate, which helps to centre the position of the product. This design ensures easy installation of the faucet.

The faucets are made of high-quality materials using components of reliable brands:

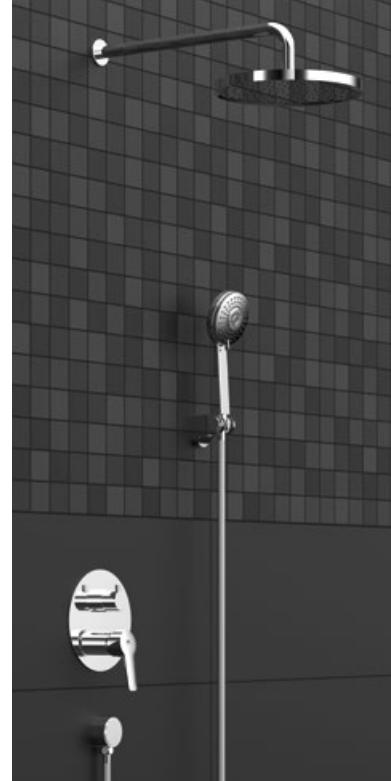

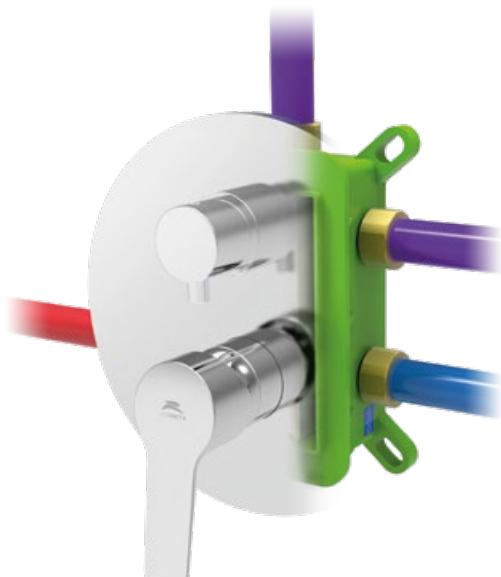

- High-quality brass (copper ≥60%),
- 35 mm ceramic cartridge Citec (Spain),
- Neoperl aerator (Germany),
- 182 mm spout, rotating 360°.

These faucets are suitable for various styles of interiors, and go well with both classic and countertop washbasins. Practical decoration for the bathroom!

Time tested solution – concealed shower faucets KUBO.

Kubo-1F and Kubo-2F are a universal brass concealed faucet, but we offer two different designs of external parts and complete shower sets: only with a handshower, or a combination of a rain shower head and a handshower.

The included flush-mounted box, made of durable ABS plastic with brass connections, guarantees reliable and easy installation.

The latest trend of today in the category of concealed faucets – concealed thermostatic faucets THERMO.

When the advantages of thermostatic and concealed faucets are combined, we can be sure that it will be a great success. From now on we offer push-button concealed thermostatic two- and three-function shower faucets: THERMO-2F and THERMO-3F. By pressing a button, customers will determine whether water is flowing in the shower head, handshower or spout, and the thermostat will guarantee a constant, comfortable and safe temperature, regardless of changes in hot and cold water pressure in the water supply. Button marking allows convenient, intuitive operation and switching of faucet functions, and the design of the outer part does not require complicated maintenance.

The choice of faucet models allows client to buy only a faucet or a faucet with a set, which we have completed with perfectly matched shower accessories.

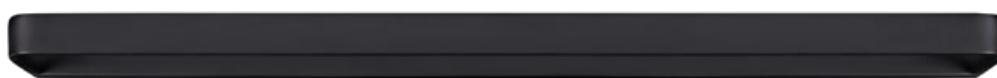

Premium class materials and components from the best manufacturers ensure impeccable functioning and durability:

- The casted faucet body is made of high-quality brass (copper $\geq 60\%$).
- TOP class thermostat with Vernet heating element.
- Wear-resistant chrome plating: the faucet body is coated with nickel (thickness: 10 μm) and chromium (thickness: 0.25 μm). The product is scratch resistant and retains its original shine even after long use.
- Mounting box construction designed for easy installation.

The RUBINETA team makes sure that the latest plumbing solutions reach everyone's home. Our client deserves only the highest quality!

BLACK ACCENTS IN BATHROOMS' INTERIOR DESIGN

There is a growing popularity of various black faucets and other bathroom accessories every year. Black bathroom products are becoming as popular as "classic" chrome or stainless-steel products. Often black matte color is combined with chrome elements, as well as glass. Black products in the interior go well with natural finishing materials, such as wood, marble or other stones, and therefore they are increasingly chosen as accents for various interior styles.

In the process of production of black faucets, RUBINETA uses technology of color coating by electrolysis. This technology provides an extremely strong and long-lasting coating that gives a product a tasteful and luxurious look. Therefore, black RUBINETA faucets not only attract the attention of interior designers, but at the same time is a great, practical and long-lasting solution for everyday use.

RUBINETA not only uses the latest technological solutions on the market and strives to keep up with fashion trends, but at the same time pays great attention to offering user-friendly complex solutions. Therefore, RUBINETA has expanded its range with a wide collection of bathroom accessories, which, in addition to the classic chrome-plated accessories, also offers consumers three original and truly distinctive black accessory series. Creating an original, comfortable and practical bathroom interior, while maintaining a rather restrained style, has now became extremely easy!

NEW BATHROOM ACCESSORIES

We offer to our clients only what we would be happy to buy ourselves. We focus on quality, attractive design, easy installation, durability and reliability in operation. This rule applies to the entire assortment of our products!

HIGH QUALITY BATHROOM ACCESSORIES

- The products in the black bathroom accessory series are made of the highest quality raw materials. Their coating using electrolysis technology ensures an extremely strong and scratch and corrosion-resistant surface.
- Chrome-plated bathroom accessories are made of stainless steel, brass and glass. Reliable chrome coating guarantees long-lasting durability and a great, shiny look.

Bathroom accessories can be purchased in sets as well as separately (not applicable to all series).

FAUCETS TECHNICAL INFORMATION

* Faucet Thermo-10, page 19

Specially designed 2-channel aerator:

1. For supplying water flow from the water pipe
 2. For the supply of filtered drinking water.
- Made of ecological ABS plastic.

High quality, durable and glossy **chrome plating**.

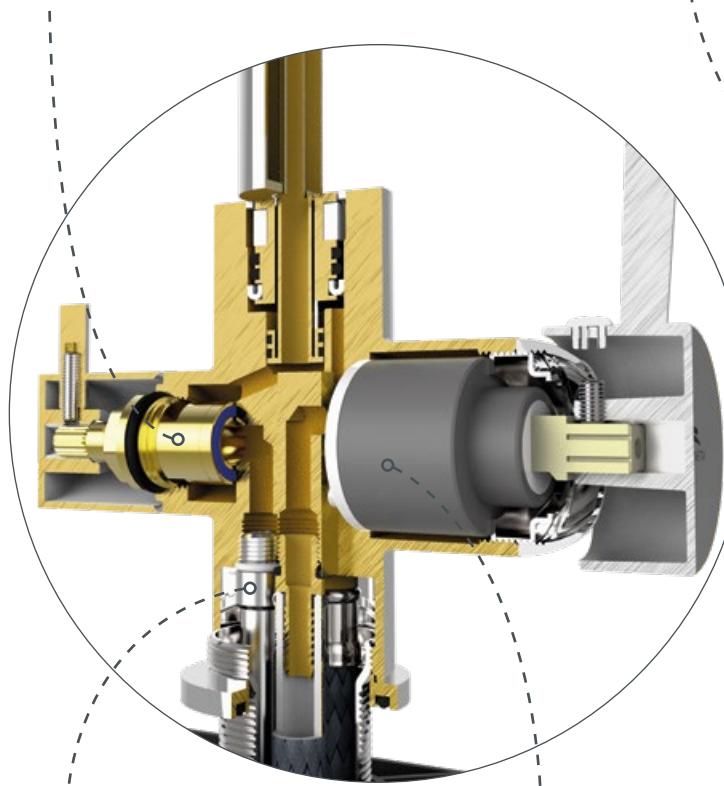

Ceramic 90° faucet valve ensures convenient and high-quality water flow control. Warranty for 150,000 switching cycles!

Faucet's body and spout are made of only high quality brass. The inner tube of the spout used in faucets for filtered water is made of copper. Warranty for 80,000 cycles.

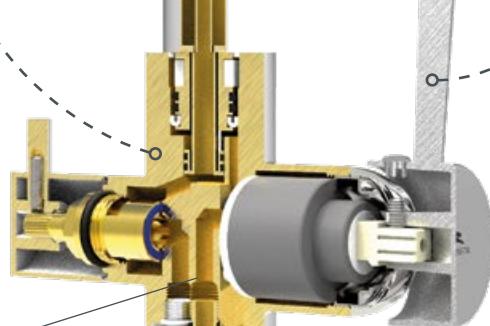

Handle – facilitates even temperature and water flow regulation. Adjustment angle 110°. Chromed metal.

Separate connection for filtered water.

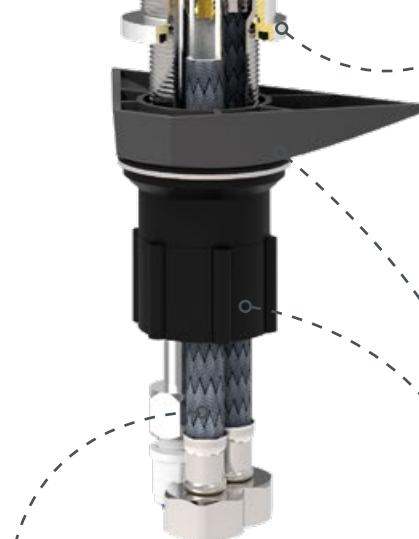

Ceramic cartridge regulates water flow and temperature. Warranty for 150,000 switching cycles!

Faucet base is a decorative metal component for covering the faucet mounting hole in the washbasin / table top.

* Faucet Ultra-32, page 50

Flexible faucet connection hoses 60 cm FLIESSEN connection hoses made of PEX type pipe, braided with polyester, which is covered by a warranty of up to 10 years!

Mounting kit – a convenient and reliable mounting solution, perfect for even thin-walled sinks.

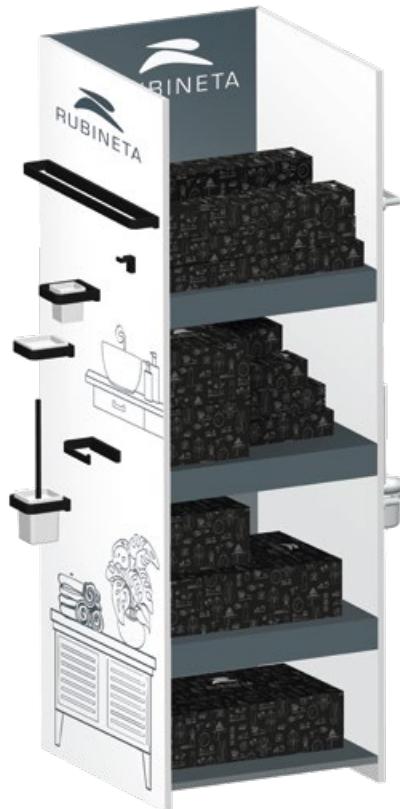

STANDS

Branded stands with standard dimensions:

- GLOSSY type stands for faucets display

- Stands for displaying 2 or 3 series of bathroom accessories

- Various stand solutions for concealed faucets

- ECO TWIN stands for shower products and spare parts

Individual non-standard product display solutions are possible.

Branded cardboard boxes for:

- faucets
- faucet sets

Branded cardboard boxes for:

- bathroom accessories

Branded cardboard boxes for:

- shower products
- some spare parts for faucets

Blister packaging for:

- miscellaneous shower products
- some spare parts for faucets

Small bag with cardboard hook for:

- some spare parts for faucets
- faucet accessories

FAUCET MAINTENANCE RECOMMENDATIONS

Dear ™RUBINETA clients! Please note that proper maintenance and adherence to the operating rules will prolong the life of the product you have purchased.

Continuous maintenance of the faucet's surface and all its components will help to ensure its impeccable appearance throughout its service life. To do this, simply wipe the surface with a soft cloth or microfiber cloth. Stains left on the chrome-plated and/or painted surface of faucets by water-containing minerals can be easily removed with soap or a mild dishwashing detergent. After that, wash the surface with clean water and wipe with a soft cloth.

To protect the internal components of the faucet and ensure the longevity of it, we recommend installing a water filter before installing the faucet.

Timely cleaning the faucet and all its parts is a guarantee of reliable operation of the faucet. Periodically (every month) clean the dirt and limescale that has accumulated in the aerator. After unscrewing and removing the aerator, rinse the inner sieve of the aerator under a strong stream of water; immerse the sieve in the vinegar solution for two hours when hardened deposits are found. In the same way, clean the mineral deposits that have accumulated on the shower heads and the nozzles of the ceiling shower head.

Don't forget to periodically replace some naturally worn spare parts with new ones, which durability directly depends on the composition and quality of your water: gaskets, aerators, ceramic cartridges, faucet valves. You will find all the spare parts you may need for the faucet you have purchased during its operation in this catalogue, and you will be able to buy it at points of sale.

You will find all the manufacturer's recommendations in the warranty card included with the purchased product.

RUBINETA ONLINE

Check out RUBINETA products in this catalogue or on our website www.rubineta.com.

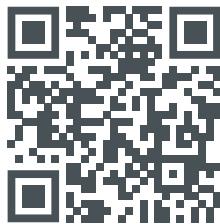

HERE YOU WILL BE ABLE TO:

- Find all our products with advanced characteristics and specifications;
- Download technical drawings, diagrams, product photos, catalogues and brochures;
- Get acquainted with the news of our company;
- Get acquainted with the terms and conditions of Civil Liability Insurance and warranty rules;
- Find contacts of our trading partners.

Let's connect on our social networks:

Full catalogue:

The monitor shows the Rubineta website homepage. The top features a large image of a shower head with water flowing. Below it is a section titled 'Certified faucets' brand' with a small image of a faucet. To the right is a 'News' section with two articles: 'LIKE A POWERFUL ETNA ERUPTION' and 'UNIVERSAL SPOUTS FLEXY'. The smartphone shows a mobile version of the same website, with a similar layout and content.

Did you know that fresh water makes up only 3% of the world's water resources, and only 1% of water is suitable for drinking? Extreme climate changes are having a negative impact on our planet. The effects include: melting glaciers, rising sea levels, more frequent floods and droughts in individual regions of the planet, ecosystem degradation, biodiversity loss and declining soil fertility, and the negative effects of increasing pollution on human health.

Saving natural resources and water is a particularly important goal. Therefore, we must all make a significant contribution to saving that 1% of drinking water supply.

RUBINETA PROTECTS NATURAL RESOURCES

Often a person unknowingly consumes more water than he or she actually needs. RUBINETA products are designed with the idea that each product will function in a way that saves one of the most important natural resources - drinking water. Contactless faucets, water-saving aerators and faucet accessories that are optimally selected for assessing water consumption make a significant contribution to water savings. All this contributes to the rational use of our planet's drinking water resources.

RUBINETA is happy to see like-minded people among its trade partners and end users. Thanks to everyone who contributes to the important goal of water saving and choosing the products offered by our company!
